Central and Eastern Europe contains some of the world’s fastest growing economies. CEESP gives you the chance to learn global business—up close and personal.

You’ll learn the concepts of management through company visits, discussions with upper-level managers of multinational firms, and meetings with local government officials. And while you’re at it, spend three weeks immersed in the culture of Austria, Slovenia, and Croatia.

Do not let the opportunity to study on the CEESP pass you by! Business is becoming increasingly global and after my time abroad, inside, I simply feel more knowledgeable. Employers have really appreciated my international experience and view it as such a plus point on my resume…Going home is the only bad thing! I would recommend it to anyone.

Deciding to study abroad with CEESP is the best decision I’ve made at Auburn.
