Physicians Executive MBA at Auburn University
When the practice of medicine collides with the increasingly complex business of medicine, choosing the best course of action requires new expertise. Questions of finance, law, strategic management, and leadership affect medical practice in today's world. Custom tailored to the practicing physician, Auburn's Physicians Executive MBA allows you to develop the business skills to navigate today's complex environment while working within the constraints of a doctor's demanding schedule. Your fellow students are not assorted MBA candidates of all ages and fields of study. They're doctors. And you can count on our exceptional personal care and guidance from the moment you register until you complete your fully accredited degree.

Our unique program design:

- 21 months, start to finish
- Five short on-campus residencies and two study trips
- In-depth interactions with faculty & students
- CME credits in partnership with Southern Medical Association
- Easy access from the Atlanta airport
- Innovative distance learning technologies
- Streamlining videoconferencing collaboration
- No scheduled annual interruptions year-round
- Saturdays are yours
- Paid membership in American College of Healthcare Executives
- Six Sigma Green Belt Certification

We've made it easy to say, and even easier to do.
What our alumni are saying:

RACHANA KULKARNI, MD, MBA
Medicor Cardiology, Chairman, Department of Medicine, Robert Wood Johnson University Hospital, PEMBA 2017
“The PEMBA office understands that we are all busy practitioners. The concierge aspect of the program allows you to focus on the schoolwork, not the logistics, and I find that aspect invaluable.”

JEREMY GOODMAN, MD, MBA
Chief Medical Officer, Banner University Medical Center–Phoenix, PEMBA 2015
“My Auburn MBA gave me the confidence and the knowledge to challenge the status quo within and around me. It gave me the ability to critically evaluate my own leadership skills and those of my peers, and gave me the tools to make positive changes that have paid dividends. The basic business principles I learned helped me to see where my organization needed to improve and helped me to begin implementing changes.”

STEPHANIE FREEMAN, MD, MBA
President/CEO, The Physician’s Weigh, PEMBA 2010
“This was the best professional decision I have ever made. With my Auburn MBA, I have branched out from my role as a critical care physician. I started a health and wellness business, a medical consulting company, and wrote a book. I highly recommend the PEMBA program to all of my physician friends and colleagues.”
